

Peatland Code 2024 Facts and Figures

PEATLAND CODE

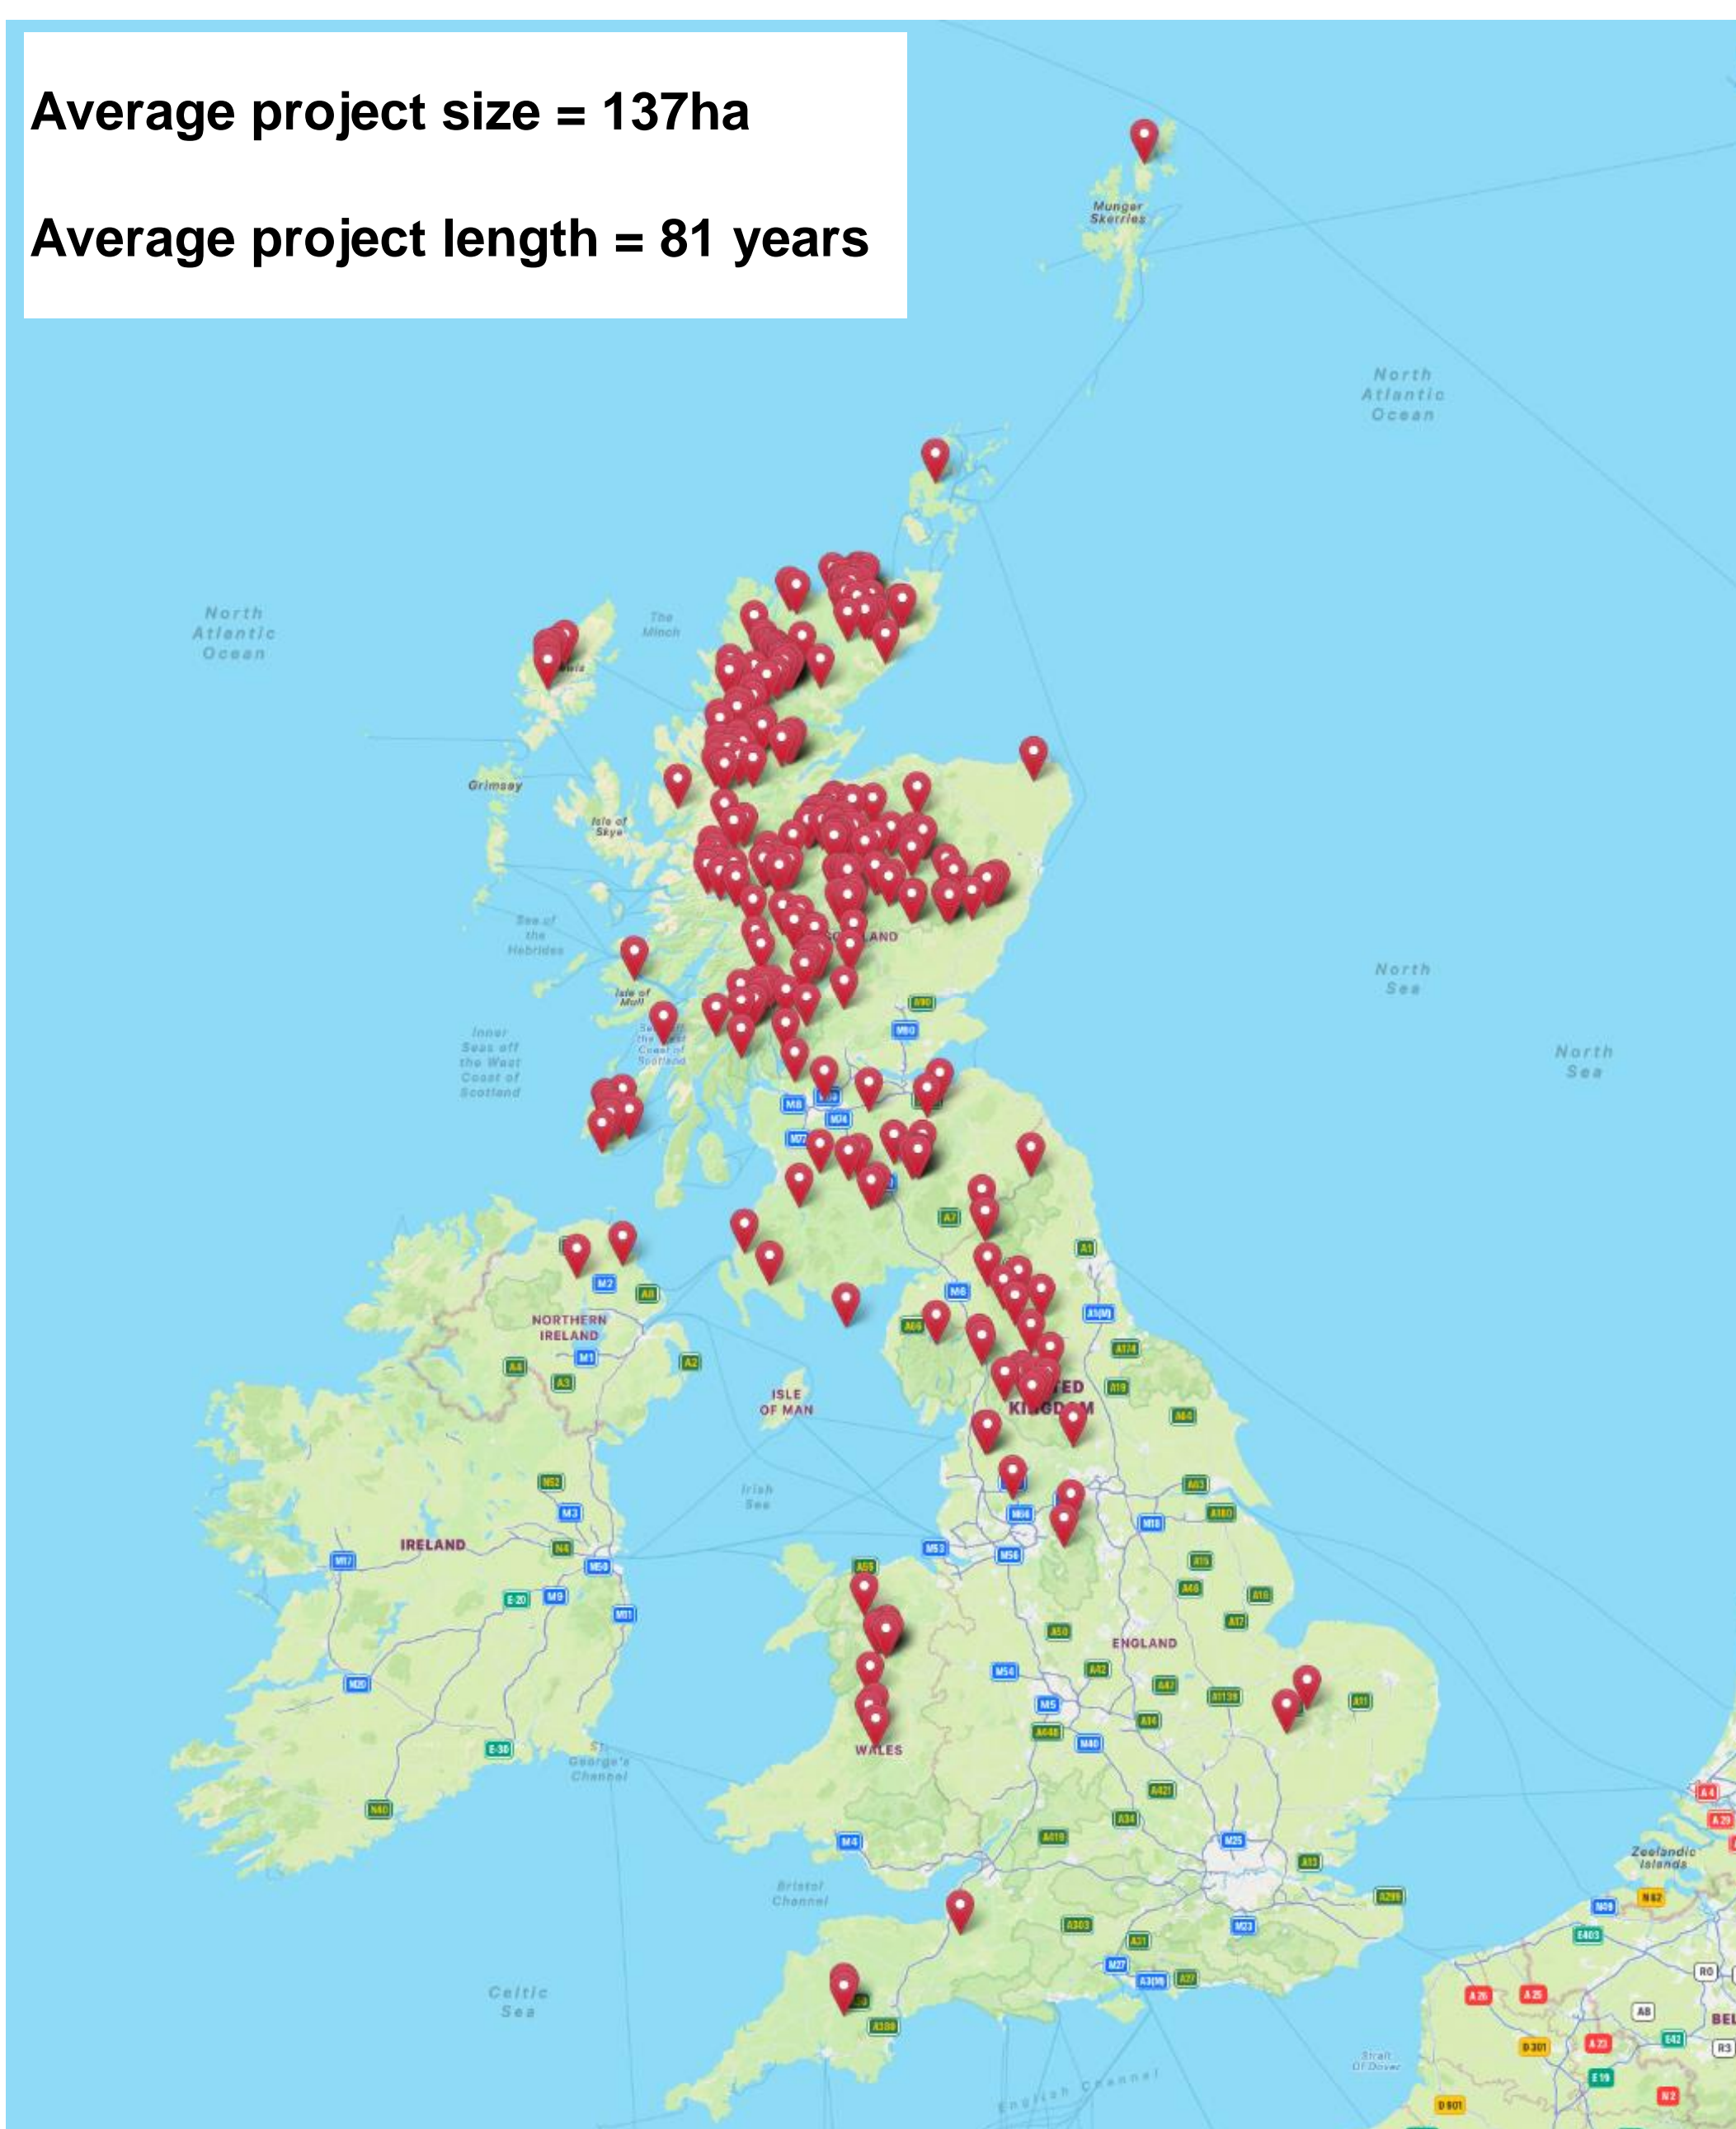

Total expected tCO₂e emission reductions over all project lifetimes

Annual increase in project registrations and cumulative predicted emissions reductions benefits. Total Units Sold to date = 46,771

300th project registration

The Peatland Code has seen rapid growth over the last few years, with 65 new projects already registered in 2024 alone. The 300th project, Kingsbeck Estate, is an upland Peatland Restoration Project in the Scottish Borders, covering 53.76 hectares. This project will be developed by Caledonian Climate.

Map: UK distribution of Peatland Code projects

Table: Peatland Code projects including national breakdown. Correct as of September 2024.

	TOTAL	Scotland	England	Wales	N. Ireland
Total No. of Projects	301	254	32	13	2
Of which:					
Under Development	156	121	27	6	2
Project Plan Validated	65	52	6	7	0
Restoration Validated	26	24	1	1	0
Verified (Year 5+)	0				

First Verifications underway

The first two verifications are expected by the end of this year. The projects Dryhope and Lochrosque both have their verification site visits planned this month.
